

Installation Instructions

Series 500

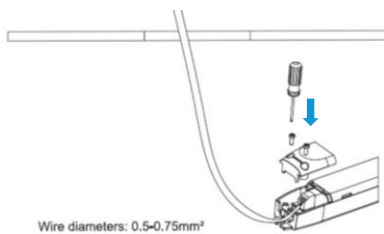

1. Ensure power is off before starting. Cut either Ø42-50mm or Ø66-70mm cutout in required surface.

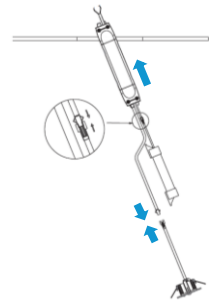

2. For hole of Ø66-70mm use expansion ring on LED module.

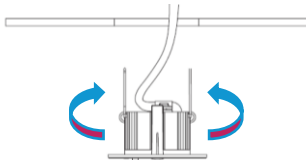

3. Wire in mains cable as per wiring regulations.

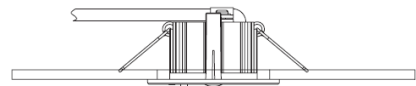

4. Connect battery and LED module. Place emergency gear into ceiling void.

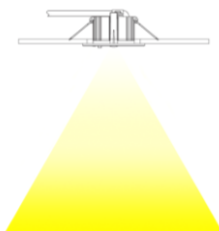

5. Fold up springs ready to insert in ceiling void.

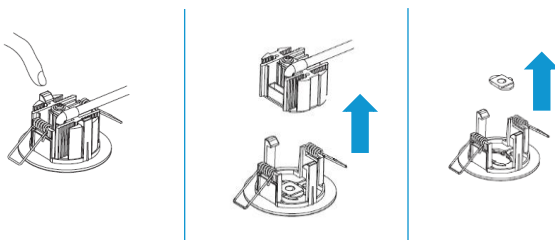

6. Ensure springs clamp onto ceiling and Luminaire sits flush

9. Switch on power. Test as required.

- a. For lens change, unclip heatsink, remove LED module and remove lens.

- b. Position new lens into module and clip into housing. Follow steps above for mounting.
